PROFILE

DATA SCIENTIST | PEOPLE ANALYTICS: Data scientist with 8+ years of experience leveraging analytics, statistical methods, and data engineering to solve complex business problems. Skilled in data modeling, data integration, visualization, process automation, and uncovering patterns that drive operational efficiency. Strong collaborator who partners with cross-functional teams to turn business questions into data-driven solutions and measurable outcomes.

EXPERIENCE

COMPASS GROUP INC USA

Financial Business Analyst // Charlotte, NC // 03/2025 - Present

- Migration Specialist and Data Engineer for a 14-team project assisting in the ETL Clean-up and transfer of all data from ECC SAP to S4 Hana SAP. SME in Cost Center Preparation, Transformation, and management in seven lower environments.
- Documented over forty processes from end to end. Including SOPs,
- Spear-headed the Profit/Cost Center creation in the lower environments in every deployment. Helped lead the project A/B testing of Profit/Center cost center testing.
- Created GPT Automations for project teams to ensure reporting and analysis was streamlined. Used python as a guardrail for optimal GPT performance.
- Loading and tested Budget, Forecast, Sales Material, Customer, Advanced Payment, X-Ref, Daily Registers, GL History, AR Open PO, P&L Reclass, Client Owned Inventory Data and any other requirements that was requested from the Project teams.
- Collaborated with teams using a multitude of Databases/Software's included but not limited to: SAP ECC GUI, SAP S/4 HANA GUI, SAP S/4 HANA FIORI, SAP DATA SERVICES, SNOWFLAKE, CHAT GPT, PRECISLEY AUTOMATE, MICROSTRATEGY, ESSBASE, WINSCP, etc.
- Worked on an Agile project team, specifically practicing Kanban methodology.
- SME in Cost Center Preparation, Transformation, and management in seven lower environments.

LOWES

Financial Business Analyst // Morrisville, NC // 10/2024 - 10/2025

- Led Monday reporting responsibilities by running access databases and uploading exports into the Workforce Management Dashboard, ensuring field members had all necessary reports for a successful week in store. These reports included the Authorized Headcount Report, Weekly Edits, L4W Outlet Forecast Hours Report, and the SSA Report.
 - Supported Pilot Programs by providing analysis of relevant data to assist in determining project next steps and establishing performance metrics.
 - Managed Workforce Management Dashboard access for all SSC, Field, and Red Vest associates. Also responsible for completing ad-hoc data requests from the field, usually pertaining to hourly labor allocation.
-

-
- Provided ad-hoc analysis upon request from senior leadership, often with little to no forewarning, and consistently delivered within short timelines. Was responsible for weekly, monthly, and quarterly recurring reporting duties.
 - Conducted complex queries using SQL and BI software tools to extract insights, while also assisting in the management and design of the Workforce Power BI Dashboard by advising on and implementing effective visuals for stakeholder analysis.

PEPSI CO (PBV)

Business Systems Analyst // Raleigh, NC //04/2023 – 09/2023

- Provided ad hoc support on a 5 month contract learning 6+ systems in a matter of weeks. Completed 3 projects including SOP documentation. Trained newly hired junior colleagues on best practices of the full life cycle of dashboard and report creation.
- Designed and built raw datasets using ETL/ELT processes gathered from a variety of data sources including but not limited to Microsoft Office, SAP S/4HANA, Legacy applications (SAP ECC, VIP, Salient Interactive miner), Excel Power Query, SQL Server and Workday.
- Developed data driven dashboards in Power BI based on stakeholders needs and company insight gaps. Used dashboards to present technical information to non-technical audiences through data storytelling in weekly sprints.
- Maintained and optimized My SQL Server databases by creating open queries (SISS Packages) directly from data sources or manually transformed and manipulated financial, human resources, waste management and sales data. Ensured data quality and data integrity standards were met.
- Assisted and advised leadership by working directly with consulting firms (Slalom, Coalesce, etc) with data modeling strategies for choosing companies new data warehouse/ data vault tools. Worked on team of 6 to develop test environment for company wide migration to AWS and Snowflake. ▪ Worked directly with stakeholders (Finance, Supply Chain, Warehouse, Sales, etc) to create complex calculation and measures in Power BI using DAX. Provided data driven insights that supplied real-time KPIs/APIs within dashboards. ▪ Protected Power BI reports' sensitive data, using RLS to enforce data privacy and authorized user access.

CISCO

Business Analyst // Raleigh, NC //03/2021 – 12/2022

- Assisted and advised leadership by working directly with consulting firms (Slalom, Coalesce, etc) with data modeling strategies for choosing companies new data warehouse/ data vault tools. Worked on team of 6 to develop test environment for company wide migration to AWS and Snowflake. ▪ Worked directly with stakeholders (Finance, Supply Chain, Warehouse, Sales, etc) to create complex calculation and measures in Power BI using DAX. Provided data driven insights that supplied real-time KPIs/APIs within dashboards. ▪ Protected Power BI reports' sensitive data, using RLS to enforce data privacy and authorized user access.
 - Promoted to sole manager of Canadian sector, averaging 25 accounts per quarter, after leading Commercial east and west with 18% growth in ACV (FY21). ▪ Supplied growth metrics to leadership and internal stakeholders, delivering analytical insights, reviewing and mitigating SCM process errors, and data storytelling to all stakeholders through the renewal process (e.g., customers, partners, internal teams, C-level executives). Worked in Operations and Support Services through the CX (Customer Experience) org.
 - Created data visualization(e.g., Power BI, Tableau, Excel) to highlight risks and revenue opportunities through streamlined approach; aggregated data sources (internal and
-

external DBMS) to provide accurate, full-scope summaries of pre-booking SO contract items to ensure proper support throughout multi-year customer contracts.

- Executed project management procedures, guiding all adjacent teams through our 12 step process and data flow from first engagements to execution of contract closure (SME in 3 architectures). Worked with IT and Customer Success teams participating in 4 separate pilot programs in a testing environment, assessing quality risk, performance analyst, providing solution support and tool development/optimization. Following account completion, audited all accounts on a quarterly basis.
- Enabled Account Management team to provide risk assessments through contract consolidation, co- terming, offer play cost estimation, and coverage of uncovered items in customer databases; improved relationship management and inspired long-term trust with customers and partners.

CISCO

Operations Analyst // Raleigh, NC //04/2020 – 03/2021

- Go-to partner for Sales on account assessments and customer database reconciliations for products and services; instrumental to sales strategy, revenue generation, and ensuring customer success.
- Spearheaded process improvements to customer database clean-ups, collaborating with Data Operations to eliminate 92% of data pollution; eased data analysis and drove time savings.
- Collaborated cross-functionally on project to establish contract creation best practices and increase annual contract value/revenue for technology solutions.

ALLSCRIPTS

Business Analyst // Raleigh, NC //07/2019 – 03/2020

- Partnered with Sales Accounting, Finance, and Support to build strong relationships with clients and ensure compliance with medical business practice guidelines; trusted resource for business analysis.
- Ensured HIPAA compliance for electronic health records; analyzed volume/complexity of case history and ticket entry using ServiceNow, Oracle, Power BI, and Salesforce.
- Escalated recurring issues for resolution and created data visualizations and reporting dashboards to highlight gaps and opportunities; uncovered \$3M cost savings via process improvements.
- Led ETL and reporting project utilizing SQL queries and data extraction from ServiceNow and Salesforce to Power BI, creating a one-stop dashboard pinpointing positive and negative impacts.
- Analyzed data and predictive model of customer behavior for upselling and termination signals.

AUDIOCODES

Data Analyst // Raleigh, NC //06/2017 – 01/2019

- Built relationships with end-users, strategic partners, and distributors to drive sales, customer renewals, and positive customer outcomes; communicated across levels and channels.
 - Key collaborator on creation and integration of automated system that enhanced customer experience via faster, more efficient processes; delivered significant time savings.
-

-
- Ran reporting through databases (e.g., Excel, Salesforce, Oracle); conducted data gathering and analysis on large data sets to locate and close gaps in records, mitigating risk and supporting operational excellence.
